## Dual Career Couple's Career and Family Conflict and Life Satisfaction

### *Dual Career Couple's Career and Family Conflict and Life Satisfaction*

Overview	
<b>Identification</b>	E95014en
<b>Version</b>	Production Date: 2016-10-03
<b>Abstract</b> <p>The purpose of the study was to explore factors related to school teachers' job satisfaction, subjective wellbeing, and sense of happiness. The "Family and Job Satisfaction Questionnaire" was developed at the first stage of the study. Reliability and validity was supported by data collected from 217 elementary, middle, and high school teachers. In the second stage, two hypothesized models were proposed and tested by AMOS. The participants were 725 elementary, middle, and high school teachers in Taiwan area. The proposed models were supported by the empirical data. The conflicts between family and work influenced participants' sense of happiness and subject well-being. The adjustment and coping of the conflicts between work and family also influence their sense of happiness and subject well-being. The same pattern also supported the proposed job satisfaction model.</p>	
<b>Kind of Data</b>	抽樣調查資料 (Sample survey data)
<b>Unit of Analysis</b>	individuals

Scope & Coverage	
<b>Time Period(s)</b>	2006-2007
<b>Countries</b>	Taiwan, ROC
<b>Geographic Coverage</b> Taiwan, ROC	
<b>Universe</b> Teacher in Elementary, Junior High, Senior high school/ Vocational high school.	

Producers & Sponsors	
<b>Primary Investigator(s)</b>	Hsiu-lan Tien, National Taiwan Normal University, Department of Educational Psychology and Counseling
<b>Other Producer(s)</b>	Department of Educational Psychology and Counseling, National Taiwan Normal University
<b>Funding Agency/ies</b>	National Science Council

Data Collection	
<b>Data Collection Dates</b>	start 2006-12-20 end 2007-01-30 start 2007-04-10 end 2007-05-30
<b>Time Period(s)</b>	start 2006-08-01 end 2007-07-31
<b>Data Collection Mode</b>	郵寄問卷 (Mail Questionnaire)

## Data Processing & Appraisal

### Data Editing

The Center for Survey Research (CSR), Research Center for Humanities and Social Sciences Academia Sinica, has checked wild codes and out-of-range values, consistency, and open-ended responses to validate and clean data. Our findings are shown as follows, for more details check to user guide.
