

Taiwan's Election and Democratization Study, 2016-2020 (I): Telephone and Mobile Phone Interview Survey of the Presidential Satisfaction--The Seventeenth Wave (TEDS2016_PA09)

User Guide

I. Overview

| | |
|------------------------|-----------------------------------------------------|
| Principal Investigator | Chi Huang |
| Execution Institution | Election Study Center, National Chengchi University |
| Funding Agency | Ministry of Science and Technology |
| Span of Project | 2016-08-01~2017-07-31 |
| Execution | |
| Span of Investigation | 2016-09-22~2016-09-26 2016-09-22~2016-09-30 |

II. Released File Description

1. User guide

| | |
|---------------|--------------------------------------------------------------------------------------------------------------------------|
| userguide.doc | including released file description, guideline for data validation and usage, guideline for citation and contact us etc. |
|---------------|--------------------------------------------------------------------------------------------------------------------------|

2. Questionnaire

| | |
|-------------------------|---------------|
| TEDS2016_PA09_QuenE.pdf | Questionnaire |
|-------------------------|---------------|

3. Datasets

| | |
|----------------------|----------------------|
| TEDS2016-T_PA09E.csv | Comma delimited file |
| TEDS2016-T_PA09E.sav | SPSS dataset |
| TEDS2016-T_PA09E.dta | STATA dataset |

4. Program

| | |
|----------------------|------------------|
| TEDS2016-T_PA09E.sps | SPSS Syntax file |
|----------------------|------------------|

5. Codebook

| | |
|--------------|----------------------|
| codebook.pdf | Codebook description |
|--------------|----------------------|

III. Guideline for data validation and usage

1. CSR has checked wild codes and out-of-range values, to validate and clean data. There is no doubt about data accuracy after the validation.

2. The column widths of variable label and value description in the STATA are limited to 80 and 40 bytes, respectively, so the STATA dataset shows only the first 80 bytes as variable label, and the first 40 bytes as value description. In case of cut-off contexts, please see questionnaire (or code book)

3. Weighting:

Due to the increasingly high percentage of cell phone users, especially the younger Taiwanese, these people might be underrepresented in the samples collected through landline interview. To alleviate this problem, samples were collected through both landline interview and cell phone interview. As a result, the Telephone Interview data released include 1,078 samples from landline interview and 204 samples from cell phone interview.

The Telephone Interview data are weighted by raking method along with population distribution of sex, age, education, and area. The population parameters are referred to “2014 Demographic Fact Book, Republic of China”, published by Ministry of The Interior Republic of China.

IV. Guideline for citation

Citation, based upon the requirement of various journals, theses or dissertations, can be revised.
