### III. Guideline for data validation and usage

1. CSR has checked wild codes and out-of-range values, to validate and clean data.  
There is no doubt about data accuracy after the validation.
2. The column widths of variable label and value description in the STATA are limited to 80 and 40 bytes, respectively, so the STATA dataset shows only the first 80 bytes as variable label, and the first 40 bytes as value description.

### IV. Guideline for citation

Citation, based upon the requirement of various journals, theses or dissertations, can be revised.
