III. Guideline for data validation and usage

1. The Center for Survey Research (CSR), Research Center for Humanities and Social Sciences Academia Sinica, has checked wild codes and out-of-range values, to validate and clean data. There is no doubt about data accuracy after the validation.
2. Note for data usage

(1) Please be attentive if “system missing” may not be listed in the variable value because of the design of skip question (N/A), missing /no response and so on.

(2) The column widths of variable label and value description in the SPSS are limited. In case of cut-off contexts, please see questionnaire.

(3) Variable values which are easy to confuse:

Questionnaire item	Variable	Context	Value	Meaning
C04	c04m90	Which topics would you avoid sharing when you post/interact with others publicly on Facebook or Instagram (IG)?	1 (None of the above.)	They wouldn't avoid sharing these topics.
