Parent Questionnaire

(For children aged 36, 48, 60, or 72 months)

Dear parents, primary caregivers,

Hello! We, the research team of the "Kids in Taiwan: National Longitudinal Study of Child Development and Care", are truly grateful that you have agreed to your child's participation in this research project and your assistance in filling out this questionnaire.

The purpose of this questionnaire is to learn more about children's health, their cognitive, language, social emotional, and motor development, as well as, their home and childcare environment, quality, and experiences. Because the items of this questionnaire were designed for children across a range of ages, please do not worry if you find your child unable to do something described by an item of the questionnaire. In order for us to gain a complete and accurate understanding of your child's development, please answer these questions with patience and answer all questions if possible. Please know that all personnel involved with this research project will strictly abide by the regulations stated in the non-disclosure agreement. Personal information about our research participants will never be disclosed. Please do not worry.

The research team would like to thank you once again for participating in this important research project and send you our best regards.

Our team is composed of national experts and scholars in the field of child development and early childhood education. The purpose of this project is to understand the development of infants and children in Taiwan. The results of this study will allow us to provide specific suggestions and evidence to parents, childcare providers, policymakers, and related personnel. Thank you so much for taking the time to participate in this project.

All the best,

The research team of "Kids in Taiwan: National Longitudinal Study of Child Development and
Care"

Part B: Questionnaires on Child Development

I. Cognitive Development Questionnaire

For each item, please select the most appropriate option based on this child's regular performances.

The following **four-point scale** is used for each of the questions. It reflects the degree to which a child has acquired and demonstrated the targeted skills and behaviors.

1 = Not yet. Child has not yet demonstrated skill or behavior.

2 = Beginning. Child is just beginning to demonstrate skill or behavior but does so very inconsistently.

3 = Intermediate. Child demonstrates skill or behavior with increasing regularity and average competence but is not completely proficient.

4 = Proficient. Child demonstrates skill or behavior competently and consistently.

No.	Item	Not yet	Beginning	Intermediate	Proficient
1	The child plays role-playing games. For example, the child pretends to cook, or pretends that he/she is a doctor.	1	2	3	4
2	Without any help, the child speaks out his/her age accurately on his/her own.	1	2	3	4
3	When the child is asked about his/her gender, the child answers correctly.	1	2	3	4
4	The child speaks out correctly two different color names.	1	2	3	4
5	The child knows what a round shape is.	1	2	3	4
6	The child speaks out correctly the name of his/her mother or father.	1	2	3	4
7	The child communicates orally the meanings of objects in his/her own drawings.	1	2	3	4
8	The child knows which book(s) he/she has read or someone has read to him/her before.	1	2	3	4
9	The child differentiates what is alive from what is lifeless.	1	2	3	4
