

# 1990 Women's Marriage, Fertility and Employment Survey

## User Guide

- I. The Center for Survey Research (CSR), Research Center for Humanities and Social Sciences Academia Sinica reorganizes and releases the data offered by Directorate-General of Budget, Accounting & Statistics (DGBAS), Executive Yuan. The released files include user guide, SPSS dataset, STATA dataset, ASCII dataset, SAS program and code book.

## II. Released File Description

1. User guide

userguide1990.doc	including released file description, guideline for data validation and usage, guideline for citation and contact us etc.
-------------------	--

2. Datasets

women1990.dat	ASCII dataset
women1990.sav	SPSS dataset
women1990.dta	STATA dataset

3. Program

prog1990.sas	SAS Program for running women1990.dat
--------------	---------------------------------------

4. Code book

code1990.doc	code book
--------------	-----------

## III. Guideline for data validation and usage

1. 1990 Women's Marriage, Fertility and Employment Survey is the collateral project investigation of Manpower Survey, 1990.
2. Starting from June 2008, no longer has DGBAS released the information regarding the corresponding codes to the real names of regions, including county/township/city/district as well as village. CSR recodes the original codes into four new sets: the years of (1)1978-1982, (2)1983-1989, (3)1990, and (4)1991 and later, respectively. The code of the same set, despite the year of investigation, represents its identically corresponding region (town).
3. In view of sample representativeness and data consistency, parts of subgroups with a small number of samples or recognizable characteristics are not appropriate to employ the estimation of an individual county/city. Therefore, the number of each county/city should rely on the DGBAS's

report.

4. In case of any inconsistency in value description between project report and dataset, priority is given to findings in dataset (and code book) after confirming with the DGBAS.
5. The column widths of variable label and value description in the STATA are limited to 80 and 40 bytes, respectively, so the STATA dataset shows only the first 80 bytes as variable label, and the first 40 bytes as value description. In case of cut-off contexts, please see code book.
6. Please be attentive if “system missing” may not be listed in the variable value because of the design of skip question (N/A), missing/no response and so on.
7. CSR has checked wild codes and out-of-range values to validate and clean data. Our findings are shown as follows:

Question No.	Variable Name	Wild Codes and Out-of-range Values	Frequency
Part 2 6	b6_2	1	1

#### **IV. Guideline for citation**
