Abstract

This survey aims to conduct random sampling survey by phone of Taiwanese population over the age of 12 of the household in 25 counties or cities in Taiwan, with 14,120 valid sampling completed in total.

In order to infer the opinions of all the population over the age of 12, the survey is weighted based on the ratio of sex and age over the age of 12 in all the cities announced by Ministry of the Interior in February 2004. On the second phase, it is weighted and returns to the original condition based on the ratio of the population over the age of 12 in each city among the population over the age of 12 in all the cities.
