

The Survey of Family Income and Expenditure, 1999

User Guide

- I. The Center for Survey Research (CSR), Research Center for Humanities and Social Sciences Academia Sinica reorganizes and releases the data offered by Directorate-General of Budget, Accounting and Statistics, Executive Yuan. The released files include user guide, questionnaire, SPSS dataset, STATA dataset, ASCII dataset, SAS program, code book.

II. Released File Description

1. User guide

userguide1999.doc	including released file description, guideline for data validation and usage, guideline for citation and contact us etc.
-------------------	--

2. Questionnaire

ques1999.doc	Questionnaire
--------------	---------------

3. Datasets

inc1999.sav	SPSS dataset
inc1999.dta	STATA dataset
inc1999.dat	ASCII dataset

4. Program

prog1999.sas	SAS Program for running inc1999.dat
--------------	-------------------------------------

5. Code book

code1999.doc	Code book
--------------	-----------

III. Guideline for data validation and usage

- (1) In order to facilitate analyzing cross-year data, CSR unifies the variable names of household equipment and appliance as the cross-year index for merge. For example, the quantity of stereos each year is named as f10. In addition, the variable of investigated year is added to distinguish the data by year.

- (2) Description of Serial No. 500 and Serial No. 250 for income and outlay
(Others are described in the appendix 2: Code book)

Serial No. 500= Serial No. 400 + Serial No. 762 - Serial No. 390

Serial No. 250= Serial No. 260 + Serial No. 270 + Serial No. 280

- (3) The results of income or outlay variables stand for household income or expenditure, respectively. For example, the result of variable itm210 refers to the total amount of one's household's full-time payroll.
- (4) In case of any inconsistency in value description between project report and dataset, priority is given to findings in dataset (and code book) after confirming with the DGBAS.
- (5) The column widths of variable label and value description in the STATA are limited to 80 and 40 bytes, respectively, so the STATA dataset shows only the first 80 bytes as variable label, and the first 40 bytes as value description. In case of cut-off contexts, please see code book.
- (6) CSR has checked wild codes and out-of-range values to validate and clean data. Our findings are shown as follows:

Question No.	Valuable Name	Wild Codes and Out-of-range Values	Frequency
Part1 Household domestic population	b29_1	000-	88
	b29_2	000-	87
	b29_3	000-	70
	b29_4	000-	51
	b29_5	000-	26
	b29_6	000-	13
	b29_7	000-	6
	b29_8	000-	3
	b29_9	000-	1
	b29_10	000-	1

- (7) Please be attentive if “system missing” may not be listed in the variable value because of the design of skip question (N/A), missing/no response and so on.

IV. Guideline for citation

Citation, based upon the requirement of various journals, theses or dissertations, can be revised.
