

Manpower Utilization Survey, 2011

User Guide

- I. The Center for Survey Research (CSR), Research Center for Humanities and Social Sciences Academia Sinica reorganizes and releases the data offered by Directorate-General of Budget, Accounting & Statistics (DGBAS), Executive Yuan. The released files include user guide, questionnaire, ASCII dataset, SPSS dataset, STATA dataset, SAS program and codebook.

II. Released File Description

1. User guide

userguide2011.doc	including released file description, guideline for data validation and usage, guideline for citation and contact us etc.
-------------------	--

2. Questionnaire

ques2011.pdf	Questionnaire
--------------	---------------

3. Datasets

mu2011.dat	ASCII dataset
mu2011.sav	SPSS dataset
mu2011.dta	STATA dataset

4. Program

prog2011.sas	SAS Program for running mu2011.dat
--------------	------------------------------------

5. Codebook

code2011.pdf	Electronic codebook
--------------	---------------------

III. Guideline for data validation and usage

1. The Center for Survey Research (CSR), Research Center for Humanities and Social Sciences Academia Sinica, has checked wild codes and out-of-range values, to validate and clean data. There is no doubt about data accuracy after the validation.
2. Note for data usage
 - (1) This is the subsidiary survey of Manpower Survey, 2011.
 - (2) Starting from June 2008, no longer has DGBAS released the information regarding the corresponding codes to the real names of regions, including county/township/city/district as well as village. The original codes have five

sets: the years of (1)1978-1982, (2)1983-1989, (3)1990, (4) 1991-2010 and (5)2011-2012, respectively. After CSR recodes the original codes, the code of the same set represents its identically corresponding region (town).

(3) In view of sample representativeness and data consistency, parts of subgroups with a small number of samples or recognizable characteristics are not appropriate to employ the estimation of an individual county/city. Therefore, the number of each county/city should rely on the DGBAS's report.

(4) The column widths of variable label and value description in the STATA are limited to 80 and 40 bytes, respectively, so the STATA dataset shows only the first 80 bytes as variable label, and the first 40 bytes as value description. In case of cut-off contexts, please see code book.

IV. Guideline for citation

Citation, based upon the requirement of various journals, theses or dissertations, can be revised.
