

Manpower Utilization Survey, 1978

User Guide

- I. The Center for Survey Research (CSR), Research Center for Humanities and Social Sciences Academia Sinica reorganizes and releases the data offered by Directorate-General of Budget, Accounting & Statistics (DGBAS), Executive Yuan. The released files include SPSS dataset, STATA dataset, ASCII dataset, SAS program, code book, and user guide.

II. Released File Description

1. User guide

userguide1978.doc	including released file description, guideline for data validation and usage, guideline for citation and contact us etc.
-------------------	--

2. Datasets

mu1978.dat	ASCII dataset
mu1978.sav	SPSS dataset
mu1978.dta	STATA dataset

3. Program

prog1978.sas	SAS Program for running mu1978.dat
--------------	------------------------------------

4. Code book

code1978.doc	code book
--------------	-----------

III. Guideline for data validation and usage

- (1) Starting from June 2008, no longer has DGBAS released the information regarding the corresponding codes to the real names of regions, including county/township/city/district as well as village. CSR recodes the original codes into four new sets: the years of (1)1978-1982, (2)1983-1989, (3)1990, and (4)1991 and later, respectively. The code of the same set, despite the year of investigation, represents its identically corresponding region (town).
- (2) In view of sample representativeness and data consistency, parts of subgroups with a small number of samples or recognizable characteristics are not appropriate to employ the estimation of an individual county/city. Therefore, the number of each county/city should rely on the DGBAS's report.
- (3) In case of any inconsistency in value description between project report and dataset, priority is given to findings in dataset (and code book) after

confirming with the DGBAS.

- (4) The column widths of variable label and value description in the STATA are limited to 80 and 40 bytes, respectively, so the STATA dataset shows only the first 80 bytes as variable label, and the first 40 bytes as value description. In case of cut-off contexts, please see code book.
- (5) CSR has checked wild codes and out-of-range values to validate and clean data. Our findings are shown as follows:

Question No.	Variable Name	Wild Codes and Out-of-range Values	Frequency		
Part 2 22	b22	100	4		
		120	1		
		150	6		
				160	1
				180	2
				200	11
				250	6
				300	25
				320	1
				325	1
				350	4
				360	1
				400	14
				450	12
				500	51
				540	1
				600	60
				650	1
				700	18
				750	1
				780	1
				800	56
				860	1
				890	1
				891	1
				900	26
				920	1
				950	2
				960	5
				980	2
				99999	5
			b27_a2	99	9
		270	11		
	b39_1	2	1		
	b42	99	89		
		270	52		

- (6) Please be attentive if “system missing” may not be listed in the variable value because of the design of skip question (N/A), missing/no response and so on.

IV. Guideline for citation

Citation, based upon the requirement of various journals, theses or dissertations, can be revised.
